

F.A.S.T. - THE FASTEST WAY TO GROW YOUR HAIR

Submitted by: SPR Public Relations Limited

Tuesday, 19 February 2013

It's been created by a leading innovator in hair care technology (Nisim International) on the back of 15 years of research and development, and has become a number 1 selling hair product in Canada. Hailed a hair growth 'must use' by men, women and Chemotherapy patients, F.A.S.T. (Fortified Amino Scalp Therapy) is the quickest way (98% faster) to grow longer, healthier hair, with results in as little as one month.

"F.A.S.T. is perfect for outgrowing a bad haircut and will help your existing hair to grow longer and healthier; with more body and bounce. F.A.S.T. is not a hair replacement therapy."

With clinically proven (tests show F.A.S.T. can double the rate of your existing hair growth after just one month's use) results, this ground-breaking Shampoo and Conditioner is available now for the first time in Boots stores nationwide and www.boots.com.

Formulated to work on all types of hair (including colour-treated, permed, on relaxers, afro hair, weaves, etc.) and on both men and women (and mild enough to use on children's hair), F.A.S.T.'s formula is designed to penetrate the hair shaft quickly allowing you to grow your existing hair at hyper-accelerated rates (up to 2 inches a month). In fact, F.A.S.T. is completely safe and can replace your current shampoo and conditioner for daily use.

Formulated with a special blend of natural herbs and essential amino acids (all natural and organic), and pleasantly fragranced, all of the active ingredients in F.A.S.T. work by feeding the hair with essential proteins and nutrients which hair needs to grow as fast as possible. The active ingredients work by passing down the hair shaft to the hair follicle where they stimulate growth. Kind to the scalp, the treatments leave no product build up and may help with minor scalp problems like dandruff and itchy scalp. F.A.S.T. does not contain Parabens, Sulfates or Dea.

CLINICAL TRIAL RESULTS SHOWED:-

- 50% of the subjects in the study had increased rate of existing hair growth after 42 days.
- A remarkable 100% of the test subjects had an increased rate of hair growth after 84 days.
- The average increase in rate was 30% with a high of 99%. All subjects saw the rate increase the longer they used the products.

DIRECTIONS FOR USE: -

For best results, it's recommended that you use both the shampoo and the conditioner daily for 1 month. Results are seen after 1 month of daily use.

- Shampoo - wash, rinse and REPEAT
- Conditioner - Apply after Shampooing and massage. Leave for 1-2 minutes.

Like a multi vitamin, F.A.S.T. only works while you are using it.

A spokesperson from F.A.S.T. says “We are delighted to have launched in the U.K, our customers just can’t get enough of our Shampoo and Conditioner that gives visible results. For years many men and women have suffered with slow growing hair or gone to the salon to change their hair style and come home disappointed; having to wait months for their hair to grow out. We’ve worked hard to find a hair growth solution; accessible to everyone, including chemotherapy patients which we believe to be the most cutting edge, scientific breakthrough in easy to use formulations.”

CUSTOMER TESTIMONIALS

Sarah Carter, 30 “I have been using the FAST Shampoo and Conditioner for just over 5 weeks and I have noticed a dramatic increase in my hair growth far quicker than its usual growth rate. As my hair is coloured, the condition is quite poor, but whilst using FAST my hair condition has been far better and smells wonderful!! Needless to say I will continue to use FAST products”

Sophia Thomas 25 “I always had long hair but recently had it cut really short and instantly regretted it. As I was browsing for a product to help my hair grow I came across FAST and decided to give it a go. I washed my hair every day with the shampoo and conditioner and had results in just over a week, everyone has noticed how much longer and softer my hair is. I’m now hopeful I’ll have my long hair back soon and would recommend it to anyone.”

Luke Goswell 24 “I wanted to grow my hair and have been getting impatient so decided to give FAST a try. The shampoo and conditioner has boosted by hair growth tenfold and I only had to use for a month to get results.”

F.A.S.T. (Fortified Amino Scalp Therapy) Shampoo and Conditioner 2 x 300ml £24.99 is available now from Boots stores nationwide and Boots.com.
