The open-minded Online casino provider offers players the opportunity to improve their Karma with a new look: the GAY layout.

Licensed online casino provider, GoldenBoysBet (<https://goldenboysbet.com>) , has shown its true colors with a new look as well as the launch of an innovative new feature for customers to change the look and feel of the website to suit their own tastes. Registered players are now able to login and choose one major new theme: the Homosexual Theme. More themes will be available soon including some more risqué themes, which will change the whole look and feel of the website.

However, changing the themes will have no impact on the overall gaming experience with customers still be able to enjoy the popular games such as Dark Knight, Hitman and Mega Moolah as well as the Award winning financial games offered by GoldenBoys (<https://goldenboysbet.com>).

Speaking of the new Homosexual layout, the marketing manager Philip at GoldenBoysBet said, "We have evolved the look and feel of the site over the past six months and we feel that the new design is far more current and appealing to our customers. As well as a change to the website we decided to add the feature for customers who wanted something different. We therefore added the ability for customers to change the overall look of the site to suit their own tastes. We have tried to provide lots of choice no matter what interests or backgrounds people have. We have included some interesting general themes with great artwork as well as more diverse themes such as Gay. We believe that we are the first online casino to offer such a choice to our customers".

The new themes that will follow are split into two broad categories; general interests, which include Animal, Futuristic, Post Apocalyptic, Wild West and Batman; and risqué, which include Erotic, Girlie, Macho, S&M and Geisha. Whilst the themes themselves may appear to be risqué, there is nothing offensive or shocking about the artwork. However, if a customer doesn't fancy any of these, they can always stick with the new classic design, which is available in blue, orange and green, and hope that lady luck is smiling down on them, whichever theme they choose.

Philip at GoldenBoysBet (<https://goldenboysbet.com>) to add:"Even though the themes layouts are not showing anything shocking, No one could access the themes unless he signs up, therefore we protect the underage visitors."
