Thursday, 28 March 2013

---

Moxtra (<http://www.moxtra.com>), a provider of productivity and collaboration solutions for personal and business use, today announces the full version availability of its iOS app in 18 new languages. The Moxtra app is free of charge and is available on the Apple App Store (<https://itunes.apple.com/us/app/moxtra/id590571587?mt=8>).

Moxtra allows users to collect, share and add voice or written annotation to videos, photos and files from an iPhone, iPad or web browser. Moxtra's cloud-based project binders help manage, present and share projects, trips, parties and more. Following the success of its January 2013 launch, full versions of Moxtra are now available in 18 languages: Chinese, Danish, Dutch, English, Finnish, French, German, Indonesian, Italian, Japanese, Korean, Portuguese, Russian, Spanish, Swedish, Thai, Turkish and Vietnamese.

"Since the January launch of our app in English, we've seen strong global interest for localized versions. We're extremely excited to announce such a wide variety of languages for the areas that have expressed the most interest in Moxtra," said Subrah Iyar, CEO and co-founder, Moxtra. "Allowing our users the choice to use Moxtra in their own language will enhance their experience, which is crucial with such a customizable, collaborative app."

With Moxtra, users can collaborate on projects, events and more with its Private Group Share (<http://www.moxtra.com/features/private-sharing/>) functionality. Users can also record their voice (<http://www.moxtra.com/features/moxtra-note/>) and annotations on top of files to create a video story or conduct a real-time meeting to present documents, photos, video or music via VoIP. Moxtra is currently integrated with Facebook, YouTube, Dropbox and Box.

The Moxtra App is available on the Apple App Store at [www.itunes.com/appstore](http://www.itunes.com/appstore). To learn more, visit: [www.moxtra.com](http://www.moxtra.com).

## About Moxtra:

Moxtra is a Silicon Valley-based technology company focusing on productivity and collaboration solutions spanning mobile to desktop, from consumer to business. Founded by the team who brought us WebEx, Moxtra's app provides cloud-based project binders for managing, presenting and sharing personal and professional files, photos and videos. Moxtra features: private group share functionality, voice and annotation recording and real-time meeting capability. Moxtra integrates with Facebook, YouTube, Dropbox and Box. Moxtra is available on the Apple App Store. For more information, visit [moxtra.com](http://moxtra.com).
