

# Receive ISO Standard I.T. Support From Tunbridge Wells Company Plexus

Submitted by: mkLINK Ltd

Thursday, 4 July 2013

---

Companies looking for exceptional I.T. support (<http://www.plexus-it-support.co.uk>) now have no need to look any further than Tunbridge Wells based company Plexus Business Solutions Ltd.

Great I.T. Support (<http://www.plexus-it-support.co.uk>) skills and services of the level, breadth and reliability that forward thinking UK SMEs require can actually be quite a rarity in UK. Customers of Plexus of Tunbridge Wells, Kent (<http://www.plexus-it-support.co.uk>) on the other hand have the confidence of knowing their I.T. Support partner (<http://www.plexus-it-support.co.uk>) is one of a select number who have achieved the internationally recognised ISO 27001:2005 Information Security Standard (<http://www.plexus-it-support.co.uk>).

Achieving the ISO 27001:2005 standard is an important way in which organizations who manage information on behalf of others such as I.T. Support companies (<http://www.plexus-it-support.co.uk>) can demonstrate that the confidentiality, integrity and availability of any kind of written, spoken or electronic information in their care is safeguarded and has the correct and compliant security controls in place.

This means that by choosing Plexus Business Solutions Ltd (<http://www.plexus-it-support.co.uk>) as their I.T. Support partner (<http://www.plexus-it-support.co.uk>) customers are not only assured of a high standard of I.T. Support services but they are also taking an important and positive step in managing their own compliance with data protection requirements and other applicable legislation.

The June 2013 issue of the ISO Quality Services Limited newsletter says of Plexus's achievement:

"Plexus Business Solutions Limited (<http://www.plexus-it-support.co.uk>) is a company who offer a complete range of consultancy, delivery and support services, giving you the option to request a specific IT skill or, more commonly, take a fully integrated end-to-end IT solution, and are based in Tunbridge Wells, Kent (<http://www.plexus-it-support.co.uk>). The company has achieved the ISO 27001:2005 Information Security Standard. There experienced and highly qualified consultants have built up a full understanding of today's computer systems and the tremendous potential they hold for business in the future."

The newsletter also highlights the quality of the Consultants at Plexus and their ability to give a special level of value to SME's:

"Plexus's IT consultants (<http://www.plexus-it-support.co.uk>) combine corporate levels of knowledge with an intimate knowledge of business reality. Their ability to consistently deliver big business solutions at SME business prices has made them the fastest growing IT Consultancy Company (<http://www.plexus-it-support.co.uk>) in our market sector."

Ragnar Percy-Bell of Kent based I.T. Support Company Plexus Business Solutions (<http://www.plexus-it-support.co.uk>) comments:

"We are delighted to achieved the ISO 27001:2005 Information Security Standard. We understand and take very seriously our obligations to safeguard any information relating to our customers. We also know that

all organisations have to comply with data protection requirements and legislation, and by choosing us as their I.T. Support partner (<http://www.plexus-it-support.co.uk>) our customers have the added bonus of knowing that this is one way in which they can help meet their own data and information security compliance (<http://www.plexus-it-support.co.uk>) goals.

Yes it's great to achieve the ISO 27001:2005 standard (<http://www.plexus-it-support.co.uk>) but it's also important to remember that the quality of the many different I.T. Services (<http://www.plexus-it-support.co.uk>) that we offer is still the primary reason why our customers choose us.”
