

# ipc&m and Flex Databases mark the first anniversary of a partnership

Submitted by: Flex Databases

Tuesday, 10 December 2013

---

December 10, St. Petersburg, the Russian Federation. Flex Databases (<http://www.flexdatabases.com>), a company specialising in Professional Services Automation (PSA) for pharmaceutical industry, announced today that a successful milestone of one year of joined work has been reached with ipc&m (<http://www.ipcm.de>).

ipc&m, International Pharma Consulting & Management GmbH is a trustworthy, privately held and funded company offering a comprehensive range of drug development, regulatory and management services from expert consulting to the management (inclusive monitoring) of clinical trials in the Central and Eastern European (CEE) region.

"To us, Flex Databases represent a combination rarely seen in the clinical technology field", said Dr. Tobias Schmidt, Managing Director of ipc&m. "This is a platform covering technology needs which would ordinarily require multiple vendors, as it covers areas such as HR, Resource Planning, Learning Management and CTMS. And, at the same time, this is a company that possesses both outstanding software and the people who can help a user get the best out of their technology. As I started working with Flex, I quickly came to realise that when Flex promise something, they always make good on their promise."

"We are looking back on our first year with ipc&m with satisfaction which comes from a job well done", said Olga Loginovskaya, Director of Business Development and Marketing at Flex Databases. "Over the course of the year ipc&m became one of our biggest endorsers. When we first came in touch ipc&m were quick to grasp all the advantages a PSA platform brings to clinical research, and we are glad to see them as excited about our technology today as they were the day we first met."

## About ipc&m

ipc&m International Pharma Consulting & Management GmbH ([www.ipcm.de](http://www.ipcm.de)) is a privately held company offering a comprehensive range of drug development, regulatory and management services from expert consulting to the management and monitoring of clinical trials in the Central and Eastern European (CEE) region. The company has legal entities/ offices in Russia (Moscow) and Germany (Munich area). Senior Management of the company consists of executives with close to 20 years of drug development and healthcare experience. ipc&m competitive edge comes from in-depth knowledge of country-specific regulations, strong regional network of experts and reliable vendors. The majority of the ipc&m team come from medical background, staff have excellent communication skills and are proficient in English.

## About Flex Databases

Flex Databases ( [www.flexdatabases.com](http://www.flexdatabases.com) ) is a Professional Services Automation company specialising in pharmaceutical research. Platform approach adopted by Flex Databases allows to eliminate manual re-entry of data, as information from each module of the system is shared across the platform. Proprietary software developed by Flex Databases allows to quickly generate new functionality, customise solutions for each client and link different modules through platform-wide workflows. Some of the areas covered by Flex Databases are timesheets, project management, subject tracking in clinical trials, site payments,

investigator and site management, budget tracking, HR records, expenses, SOPs and learning.
