Specialist supplier to Federal Government and DOD selects Becrypt security solutions

London, UK, 23 September, 2014 – Seeds of Genius, a specialist supplier to Federal Government and DOD, has joined the fast-growing number of companies across North America now certified to supply Becrypt's cyber security solutions. Seeds of Genius has become a premium Certified Reseller for Becrypt and is able to supply Becrypt's latest cyber security solutions that includes the Virtual Desktop Infrastructure security solution tVolution, and its range of endpoint security products. Due to the uncertainty around TrueCrypt, Seeds of Genius has already won several contracts for Becrypt encryption solutions within the financial services sector.

Congetta Kelley, President and Owner of Seeds of Genius, which celebrates its 10th anniversary in September, commented; "At Seeds of Genius we are constantly on the lookout for the latest security solutions that will enable our key clients in Federal and DOD departments to address the security challenges that they face daily. Our engineers were quick to spot the unique approach taken by Becrypt and the exciting opportunities that its technology provides. We were also impressed by the product roadmap which gives us the confidence that Becrypt will be continuing to provide innovative products that will ensure we are able to support our clients with the very latest in security solutions well into the future."

As part of its commitment to Becrypt, Seeds of Genius engineers with top secret clearance have built a consultancy practice offering advice and guidance for Federal departments and DOD, based around the Becrypt technology. Seeds of Genius will also be a key launch partner for emerging technologies in these markets.

Dr. Bernard Parsons, CEO of Becrypt said; "Our campaign to expand our network of resellers in the US is going well, and we are delighted to be working with Seeds of Genius, who have already signed several significant deals based on Becrypt technology. Seeds of Genius' focus on security conscious sectors such as federal government, DOD, education and finance makes them the ideal partner for Becrypt."

## Becrypt Solutions

### Enterprise Data Security

Becrypt's Protect Suite for Windows, and Titan for Android™, provide encryption and authentication solutions for protecting data, sharing it securely with trusted third parties and guarding against data leakage, across a range of devices including desktops, laptops and tablets.

Becrypt Enterprise Manager provides a central management solution for mixed estates enabling remote updates, capture of audit/security event logs and device repudiation when required.

### Secure Remote Access

tVolution is a highly secure operating system that enables any device to become a thin client or zero

client that can connect securely to a Virtual Desktop Infrastructure (VDI). Providing a clean user experience, tVolution can be configured to provide only those business applications that the user needs to do their job, and allows organisations to use lower spec devices such as netbooks, or repurpose older equipment.

tVolution Mini – the latest addition to Becrypt's Secure Mobility offerings, tVolution Mini is a secure miniature computer the size of a credit card, which enables user-friendly fully-managed secure remote access to a corporate network at an incredibly low cost.

#### Mobile Device Management

Becrypt MDM iOS enables the central rapid provisioning of iOS devices to promote mobile security best practice. MDM automates provisioning processes and policy conformance. It ensures a clean user experience by avoiding the use of third-party Apps (such as secure bubbles) and leverages the security built into the iOS operating system.

#### About Becrypt

Becrypt is a leading supplier of innovative mobile security solutions and services that are Government-certified, and suitable for many industry sectors. Becrypt provides a range of cyber security solutions to protect data at rest and data in use, across a broad range of platforms, including desktops, laptops, tablets and smartphones, running Windows, iOS and Android. Becrypt's secure thin client technology supports virtual data infrastructure (VDI) access, enabling secure and rapid IT transformation within the enterprise, as well as cost effective remote access.

Through its focus on product assurance, multiple platforms and centralized management, Becrypt's solutions enable the most security conscious organizations to deliver cost effective compliance, whilst maintaining flexibility, choice and usability for their users.

As a leading supplier of encryption technology to the UK and US Federal and Local Government, Ministry of Defence/Department of Defense and UK and US Law Enforcement, Becrypt also offers cyber security

consultancy and bespoke systems.

Becrypt has offices in London, UK, and McLean, VA, USA. For more information visit: BECRYPT
