

Cashback Scheme for Energy Efficient Homes Extended, DG Solutions Comments

Submitted by: DG Solutions

Monday, 9 March 2015

Leading double glazing provider, DG Solutions, has commented on the recent news regarding the extension of The Green Deal Home Improvement Fund (GDHIF).

Home owners throughout the country have received vouchers in order to help them install energy efficiency measures.

In a recent move by The Green Deal Home Improvement Fund, homeowners have now been given more time to use their vouchers. The GDHIF allows consumers to apply for funding in the form of vouchers for selected energy-saving installations such as high-quality double glazing and solid wall insulation.

The scheme was started in July last year, with the vouchers being valued at a maximum of £7,600. A huge £120 million vouchers were snapped up during the first release. The scheme was forced to close after six weeks.

However, the scheme has now re-opened for the second time with around £30 million extra vouchers being handed out throughout December. The recently announced extension applies to around 3,900 vouchers that will or have already expired between December 2014 and 31st March 2015.

As experts in double glazing, DG Solutions has taken a keen interest in The Green Deal Home Improvement Fund. A spokesperson from the company made the following statement: "It is fantastic to hear that The Green Deal Home Improvement Fund has been extended. Thousands of home owners will be looking to improve the energy efficiency of their home this winter. With a time extension on the vouchers, homeowners will now have more opportunity to benefit from warmer and cost effective homes."

DG Solutions (<http://www.dgsolutions.co.uk/>) is a leading provider of double glazing throughout the southeast. With 30 years of industry experience, DG Solutions specialise in providing a range of bespoke energy efficient, double glazing solutions.

Proud holders of a Government Endorsed Standard's 'Trust Mark', DG Solutions has sustained a well-earned reputation for door, window, roofline and conservatory installation.
