

# RED STACK TECH WINS ORACLE 'ENGINEERED SYSTEMS PARTNER OF THE YEAR' FOR SECOND YEAR RUNNING

Submitted by: Red Stack Tech

Wednesday, 25 March 2015

---

Oracle Platinum Partner, Red Stack Tech, have announced they have been awarded Oracle 'Engineered Systems Partner of the Year 2015.' This is the second year running that the company has won the coveted title in recognition of their commitment to delivering innovative, specialised Oracle Engineered Systems solutions, fostering successful customer relationships and achieving measurable growth. The award was presented to the management team at the Oracle UK Specialised Partner of the Year Awards, held on 19th March at the Rosewood London.

Red Stack Tech was formed in January 2015, following the merger of Oracle Platinum Partner, e-DBA Ltd with Business Intelligence Specialists, 3sixty-analytics and the acquisition of Polish Oracle Partner, Gridwise. Over the last three years, the company has established a strong focus on Oracle Engineered Systems, having invested in Oracle Engineered Systems proof of concept units, an Oracle Exadata Machine, an Oracle Exalytics machine and an Oracle Database Appliance machine. The company has also ensured it remains ahead of the curve by continually adding the latest innovations in Oracle technology to its portfolio of products and services, including the new-generation of Oracle X5 Engineered Systems, unveiled by Larry Ellison in January 2015.

Last year, under the brand name e-DBA Ltd, the company's unique specialism and ability to deliver successful projects to a worldwide customer base that includes several FTSE 100 customers, was recognised with the prestigious title of 'Oracle Engineered Systems Partner of the Year 2014 UK, EMEA and Global.'

Alex Louth, Managing Director, Red Stack Tech, picked up the award alongside James Anthony, Technology Director, and Chris Wilson, Sales Director.

Alex Louth, said, "We are absolutely thrilled to have won this award - it is a fantastic achievement to be recognised as Oracle Engineered Systems Specialists not once but twice in as many years! As a company, innovation and customer service are at the cornerstone of everything we do, which is why we are very proactive in introducing the latest Oracle technology to our service capabilities and in seeking out opportunities to extend our specialist knowledge in this area to an even broader customer base, both in the UK and globally."

James Anthony, said, "We are very proud to be named 'Oracle Engineered Systems Partner of the Year' for the second year running! We have always maintained a strong focus on Engineered Systems and since winning the award last year we have continued to invest heavily in this area, ensuring our customers benefit from the latest technological innovations and the highest level of service. To once again be recognised by Oracle as the leading UK Engineered Systems specialists, is a great achievement for our team and will serve to further strengthen confidence among our customers in our services and solutions."
