Notes

National Geographic Traveller (UK) is published under license by APL Media Limited, from the National Geographic Society in Washington, D.C. It joined the family as the 15th local-language edition. The 180-page travel and lifestyle magazine is packed full of you-are-there photography, authentic travel experiences and inspiring narratives. natgeotraveller.co.uk

National Geographic Traveler (USA) is the world's most widely read travel magazine, created in 1984. It championed sustainable travel before it was cool and, eight times annually, celebrates journeys that are about place, experience, culture, authenticity, living like the locals and great photography. It makes a distinction between tourism and travel and stresses inquisitive, not acquisitive, trips. It employs storytelling and outstanding photography to inspire readers to pick up and go, eschewing fashion and fluff in favour of articles that offer a strong sense of place, inspiring narratives that make readers take trips, and solid service information to help them plan those trips.

The National Geographic Society is one of the world's largest non-profit scientific and educational organisations. Founded in 1888 to "increase and diffuse geographic knowledge," the member-supported Society's mission is to inspire people to care about the planet. Through its online community members can get closer to explorers and photographers, connect with other members around the world and help make a difference. National Geographic reflects the world through its magazines, television programs, films, books, DVDs, radio, maps, exhibitions, live events, school publishing programs, interactive media and merchandise. National Geographic magazine, the Society's official journal, published in English and 39 local-language editions, is read by more than 60 million people each month. The National Geographic Channel reaches 440 million households in 171 countries in 48 languages. National Geographic Digital Media receives more than 27 million visitors a month. National Geographic has funded more than 10,000 scientific research, conservation and exploration projects and supports an education programme promoting geography literacy.
