Intelligent fulfilment of customer orders helps omni-channel retailers maximise available stock and deliver higher levels of customer service

Eurostop, the leading supplier to the fashion, footwear and lifestyle sectors, has announced the release of the latest version of its e-fulfilment module, available for its e-pos Touch (and mobile POS) solution. The e-fulfilment module provides an intelligent stock fulfilment system that prioritises and fulfils customer orders from across company stock. e-fulfilment uses the head office stock control system, e-rmis to facilitate intelligent sourcing from multiple locations. This enables the retailer to fulfil customer orders in the best and quickest way; which is vital in a modern retail system that faces increasing demands and sophisticated experiences from consumers.

Eurostop's e-pos system uses the latest touch screen and mobile technology, with user friendly screens that are easier and faster to use. e-fulfilment integrates with e pos Touch and enables retailers to satisfy customer orders, including e-commerce orders, directly from the store tillpoint. It decides if an e commerce order can be fulfilled either from the branch stock or warehouse based on different criteria set at Head Office. If the store is chosen, the system automatically alerts the store e-pos that it has the items in stock so that fulfilment of the orders are prioritised.

Advanced screens for filtering searches for orders, and picking and packing streamline the process. Furthermore additional scanning hardware ensures accurate stock movements and stock visibility across the company.

The new version also includes the option to integrate with MetaPack delivery management systems used by retailers and specialist suppliers to ship millions of parcels worldwide.

Deborah Loh, Marketing Manager at Eurostop, said; "This latest version of e fulfilment complements our fully integrated suite of retail management solutions designed to support omni-channel retailers. Our technology has been designed for a competitive marketplace which demands a connected customer shopping experience across a combination of channels. We are pleased to see that the e-fulfilment module has been streamlining our customer's retail processes, optimising order fulfilment, while at the same time, allowing them to focus their energy on their customers."

NOTES TO EDITORS

About Eurostop

Founded in 1990, with operations in London, Singapore and Shanghai, Eurostop provides complete solutions

for Retail Management for the Fashion, Footwear and General Merchandise sectors encompassing both hardware and software.

Eurostop's flagship products consist of:

e-rmis: A suite of head office management applications.

e-pos: EPOS system for standalone shops, concessions and franchises that can be easily integrated with e-rmis for larger users.

Mobile POS: wireless/mobile e-pos designed to run on Windows tablets with integrated Chip & PIN – ideal for boutique environments where there is less emphasis on the central payment desk

e-commerce: Responsive e-commerce solutions customised for independent retailers that provides a hosted and fully integrated service.

e-cubes: Data Mining. A bespoke reporting tool which allows the slicing and dicing of data as well as selective publication of results and graphical representation.

e-time: The capture of staff working hours which aids in monitoring both stores' and staff performances and productivity.

e-fulfilment: Intelligent optimisation of e-commerce orders for multi-channel retailers.

e-manager: Middleware layer that enables the fast, reliable synchronisation of product and pricing data from most major ERP solutions to your e-pos estate.

All Eurostop's solutions can be fully integrated with other management and business systems, and all major ERP systems.

As well as advising on and supplying suitable hardware, Eurostop also undertakes training, support and custom development. Its systems are available in several different languages including Chinese.

Eurostop has accreditation for Chip and PIN solutions, and together with partners Anderson Zaks and YESPay, provides a Chip and PIN managed service.

High profile customers include: Aquascutum, Ann Summers, Ben Sherman, Cambridge Satchel Company, DAKS, Ghost, Help for Heroes, Joseph, Marie-Chantal, Lotus Cars, Pretty Green, Pentland Brands Plc, Speedo, Trespass and many more.
