

# Tax Transparent Funds Service from ISC

Submitted by: Investment Solutions Consultants (ISC) Ltd

Tuesday, 1 March 2016

---

Investment Solutions Consultants Ltd (ISC) have launched a new service to deliver UK Tax Transparent Funds to the market.

Tax Transparent Funds (TTFs) have already been launched by UK Fund Providers and 2015 saw a number of events by TTF providers promoting how they can support these new fund structures. ISC understand that these new tax efficient fund structures provide a great opportunity to both asset managers and owners. The UK Government has introduced regulation which allows UK companies to market equivalent tax efficient funds to those currently established in Luxembourg and Ireland. The rationalisation of funds can generate considerable savings for fund managers, and the offer of client tax savings ensures these fund structures have recognisable benefits. These benefits make TTFs attractive to current investors and broaden the scope of potential customers.

ISC offer an end to end service to deliver these fund structures, from initial review to implementing the target operating model with those providers chosen as partners. The business case for any change requires agreement by both fund boards and investors to ensure the benefits of change accrue to both stakeholders. Delivering the business cases and ensuring the benefits are realised are the aims of this service.

ISC bring a wealth of experience in the fund management industry, being involved in product design, fund launches and review processes. ISC has also been involved in previous iterations of tax efficient single funds that were a forerunner to TTFs.

## ABOUT Investment Solutions Consultants Ltd

ISC is a team of talented consultants providing trusted advice to the investment management community. We have a very strong blue-chip client base and carry out repeat assignments for our clients. This year Investment Solutions Consultants is celebrating ten years of excellence. Founded by experienced consultants a decade ago, ISC's goal is to provide sensible solutions to the challenges facing the investment management industry. Looking ahead to the next ten years, we aim to continue facing the challenges alongside our clients. We understand the end-to-end operating model of the asset manager and the vendor landscape that supports the industry. By deploying our consulting expertise, we help our clients to maximise the efficiency and effectiveness of their operations and technologies.

ISC provides consulting skills and experience across the spectrum of investment management solutions - from system selection and implementation to operating model review and design; from programme and project management to business analysis; from front to middle and back offices; from investment managers to service providers. ISC is driven by the belief that the investment management community demands its consulting partners give value through providing quality resource able to grasp quickly the challenges and assist in delivering solutions.
