

New to the UK and direct from Singapore comes skin nourishment like no other

Submitted by: Janiro Ltd

Thursday, 5 May 2016

Exclusively bought to the UK by Janiro Ltd the Bio-Essence Bio-Energy Snail Secretion product range that offers power repair for smooth and supple skin

Snail secretion is the bodily fluid discharged by snails as they crawl along the ground, forming a protective coating over skin tissue to prevent skin from abrasions and rough surfaces.

In 1980 Chile farmers discovered that when handling snails their hands became extremely soft. Any injuries and cuts occurred during the working day healed quickly without becoming infected and didn't leave scars. As snails can regenerate their own shell when diseased or damaged in the wild, it was soon realised that what restores a snail's shell could also repair human skin

Observing this the eldest farmer's son directed a rigorous scientific study about the properties of Chilean snails, which confirmed that the secretion of *Helix Aspersa Muller* species have an extraordinary regenerative capacity on human skin.

Snail secretion contains active ingredients which benefit the skin, such as allantoin, collagen, glycolic acid, natural anti-bacterial agents, vitamins A, C and E. All these help repair dry skin and improve dull complexion. They stimulate skin renewal, balance oil secretion, prevent formation of pimples and soothe skin.

There are four products within the range:

Skin repair Foamy cleanser
Snail secretion Repair Serum
Repair and Smooth Cream
Repair Mask
