

Quiptel Powers Advanced OTT TV Services in Mongolia

Submitted by: Rise PR

Friday, 9 September 2016

Quiptel (<http://www.quiptel.com/>) is extremely pleased to announce that they have deployed their QMP solution with the number 1 telco provider in Mongolia – MobiCom (<https://www.mobicom.mn/en/m/264>), to power their mobiPLAY TV and Video platform (<https://www.youtube.com/watch?v=IOfrnsZtEKQ>), delivering a wide range of services to mobile devices across the country.

Sandip Sarda, Chief Executive Officer of Quiptel HK Ltd, said: "We are delighted that MobiCom chose Quiptel and we are extremely glad to be working with their exceptional team. The Quiptel solution is designed to work in the most diverse network conditions, with no compromises on either QoS or QoE with all the advanced features you can expect from a next generation OTT software platform."

David Holliday, CEO of MobiCom Corporation said "In Mongolia's dynamic telecommunications sector, it's all about getting things right: getting the right people, the right technologies and products, at the right time and with the right cost. We chose Quiptel as they have made a strong commitment to partner with us to provide our customers with the latest range of advanced media services to make their lives easier and more enjoyable."

About MobiCom (<https://www.mobicom.mn/en/m/77>)

The MobiCom Corporation is a world-class communications services and technology company that pioneered mobile technology in Mongolia. Since its inception in 1996, MobiCom has played a pivotal role in transforming Mongolia's economy. MobiCom provides nearly half the population of Mongolia with vital communications services through 64 branch units, 2,200 dealers and over 10,000 mobile sales points operating throughout the country.

About Quiptel
