---

DiTaaS is an intuitive platform providing infrastructure transformation, management, automation and reporting solutions for an agile infrastructure management enterprise

London, UK, 13th September 2016 – Happiest Minds Technologies (<http://www.happiestminds.com/>), a next generation digital transformation, infrastructure and security and product engineering services company, today announced the global launch of DiTaaS

(<http://www.happiestminds.com/solutions/digital-infrastructure-transformation-as-a-service-platform/>), (Digital Infrastructure Transformation as-a-service) a platform which enables enterprises to transform from traditional to an advanced digital infrastructure.

“In the current age of digital transformation, the daunting challenge for enterprises of all sizes is in striking a right balance between legacy infrastructure and new age technology platforms. DiTaaS enables a smooth transformation of the traditional IT infrastructure to advanced digital IT infrastructure, thereby improving productivity, flexibility, and accelerating the time-to-market strategy.” said Prasenjit Saha, President, Infrastructure Management and Security Services Business (<http://www.happiestminds.com/services/managed-infrastructure-and-security-services/>) of Happiest Minds Technologies.

The managed DiTaaS platform enables enterprises to effectively leverage innovative business service capabilities in an efficient way. It consolidates management of multi-vendor infrastructure, platform and application services across the business in a secure and scalable manner. It enables businesses in their transformation journey towards agile infrastructure which are software defined, API driven etc. The core features include, Consumerisation, Software defined policies, Automation, Orchestration, Aggregation, Consolidation, policy driven access, administration and operations management.

Organisations utilising DiTaaS can increase agility, productivity of the support operations and availability of services by more than 30% through faster automated remediation.

DiTaaS aids enterprises to activate a portfolio of infrastructure management, automation, orchestration, along with centralised management of cloud and on premise services. The modular architecture of the platform offers a central streamlined view of infrastructure, usage, optimisation and expenditure, metering and charge-back, with a self-service to provision, integrate and manage.
