

# PSTG Ltd achieves standard ISO 9001:2015 certification from the British Assessment Bureau

Submitted by: Sprint Marketing

Wednesday, 12 October 2016

---

London based IT solutions firm, PSTG (<http://www.pstg.co.uk>) has achieved certification to the internationally recognised ISO 9001:2015 standard, establishing it as one of the leaders in its field.

This independent assessment was conducted by the British Assessment Bureau, a leading Certification Body, and demonstrates PSTG's commitment to customer service and quality in delivery.

"Attaining this certification is an excellent achievement that highlights PSTG's commitment to quality and service, and reflects the hard work and commitment of the whole team, who continue to focus on delivering a high quality service to our customers" said Enzo Daniele, Director, PSTG.

ISO 9001 requires organisations to demonstrate that they do what they say they do, and that they have a Quality Management System in place to ensure consistency and improvement; leading to high levels of performance and customer satisfaction. Certified organisations are committed to continuous improvement and are assessed to ensure progress is being maintained.

The benefits of certification to ISO 9001 include:

- Streamlining an organisation's procedures;
- Bringing consistency to an organisation's service delivery;
- Reducing cost and rework;
- Improving an organisation's management practices.

PSTG, an experienced systems integrator delivers solutions to mid to large sized organisations in the UK, helping them use technology innovation to transform their business. In recent months PSTG has been awarded a place on G-Cloud 8 under Lot 4: Specialist Cloud Services (<http://pstg.co.uk/news/PSTG-awarded-place-on-the-UK-Government%E2%80%99s-G-Cloud-8>) – a government public sector framework which provides public sector organisations with an easy way to procure suppliers for Cloud-based projects – to further support PSTG's commitment to their NHS and healthcare customers.

## NOTES TO EDITORS

### About PSTG

PSTG designs and delivers IT services to mid-market and enterprise organisations. With a wide breadth of technical expertise and technology partnerships we deliver tailored solutions to ensure businesses benefit from increased capability, reliability and performance, whilst operating as efficiently and profitably as possible.

From conception to completion, we'll support every phase of an IT infrastructure project. At the forefront of cloud enablement platforms, PSTG can provide an array of services that includes cloud solutions, storage, security, wireless, VoIP, infrastructure platforms and VDI solutions.

#### ABOUT THE BRITISH ASSESSMENT BUREAU

The British Assessment Bureau's reputation was established in 1969 as a specialist in certification scheme management. In 1997, the Secretary of State for Trade and Industry approved the use of the word 'British' in their title, in recognition of their pre-eminent status.

Today, they certify organisations to recognised standards, including ISO 9001 (quality management), ISO 14001 (environmental management), ISO 27001 (information security management) and OHSAS 18001 (occupational health and safety management). They also design and manage bespoke assessment schemes. Such schemes are based on the establishment of standards, which can be developed to be recognised company-wide, industry-wide, nationally, or internationally.
