

Schröder releases new LED Handrail solution

Submitted by: XL Communications

Monday, 14 November 2016

Schröder (<http://www.schreder.com/en-gb>), the global leader in LED lighting solutions, today announces the release of its new LED Handrail lighting solution for pedestrian walkways.

The Handrail by Schröder (<http://www.schrederled.co.uk/product/led-handrail/>) is manufactured from grade 316 stainless steel and features a brand new LED lighting module which seamlessly integrates into the Handrail giving smooth to touch finish.

The LED module includes the Schröder LensoFlex®2 photometric engine, which associates each LED with a specific lens to generate complete photometric distribution. This makes lighting sustainable and efficient by generating emissions savings and lowering total cost of ownership.

The Handrail can also be equipped with a Back Light Control system, which places emphasis on the minimisation of glare and unwanted light pollution. The modular LED Handrail system is available in a range of lengths, from 1000mm to 2000mm, and can be tailored to suit a variety of interior and exterior applications.

To support its customers Schröder offers a complete end-to-end LED Handrail solution, from initial concept through to design, installation and ongoing maintenance.

Adam Rice, Marketing Manager, Schröder comments, "The Handrail provides safety and guidance for pedestrians and offers a perfect integrated lighting solution for areas where high volumes of pedestrian traffic are common."

"The striking design features and use of light allows the Handrail to architecturally enhance its environment while providing essential safety requirements for pedestrian footfall."

Schröder will be exhibiting its new LED Handrail at Lux Live 2016 (<http://luxlive.co.uk/>) from 23 to 24 November at EXCEL in London.

About Schröder:

Schröder has been providing high quality lighting products since 1977 and has grown to be one of the UK's largest suppliers of street lighting and exterior decorative lighting equipment. Schröder works in partnership with customers, creating the perfect balance of efficiency, connectivity and performance to deliver stunning projects that go far beyond simple lighting.

Technical quality and aesthetic design are at the heart of the company's philosophy and coupled with its customer focussed work ethic, this has led Schröder to develop the most cost effective, energy efficient exterior lighting innovations on the market today.
