

Armour Mobile Now Listed In NATO Catalogue

Submitted by: PR Artistry Limited

Tuesday, 22 November 2016

Armour Mobile is now approved and listed in the NATO Information Assurance Product Catalogue (NIAPC) London, November 22nd, 2016: Armour Communications has been accepted for inclusion in the NATO catalogue with the Armour Mobile under the Mobile Communications category at NATO RESTRICTED. The NIAPC provides NATO nations and NATO civil and military bodies with a range of Information Assurance products and packages that meet the required operational standards, available for procurement.

Customers deploying Armour Mobile can do so via the Secure Cloud, by downloading the app and activating it. Users can be activated 'over the air' and up and running within minutes. For users looking for maximum security and privacy, an on-premises option is available, hosted and managed via the Armour Core User Management system (UMS). Armour Mobile is also able to integrate with existing PBX systems so that calls can be connected to standard office IP desk phones.

Armour Mobile operates over data-enabled networks including EDGE (2.5G), HSPA, CDMA/EV-DO (3G), LTE (4G), Wi-Fi and satellite.

"At Armour we aim to supply the consumer-grade functionality that people have come to expect, within an assured package, providing convenience and security. We are delighted to announce that Armour Mobile is now available via the NATO catalogue, and look forward to working with organisations from all industry sectors that want to keep their mobile communications private," said David Holman, a Director of Armour.

Armour Mobile recently awarded CESG CPA (Commercial Product Assurance) certification, provides government-grade secure communications for voice, full motion video, messaging and conferencing on commercial off the shelf (COTS) iPhone and Android smartphones. Armour Mobile provides an ultra-secure solution for protecting information both at NATO RESTRICTED as well as CESG OFFICIAL and OFFICIAL SENSITIVE classifications.

NOTES TO EDITORS

About Armour Comms

Armour Communications Limited is a UK based company supplying market leading technology for secure communication via EDGE (2.5G), HSPA, CDMA/EV-DO (3G), LTE (4G), Wi-Fi and satellite for voice, video, messaging and data on Android or iOS platforms. Armour Mobile also features in built secure conferencing (audio or video) between multiple callers.

Armour Mobile is available as a Cloud or an On-Premises solution, and by using the optional Enterprise Gateway, integration to a customer's PBX and onto standard office desk phones is possible.

All solutions are FIPS, NATO and CPA approved up to OFFICIAL-SENSITIVE, with additional security layers to mitigate threats up to SECRET.
