Tuesday, 6 December 2016

Basel, December 6, 2016 – The Dentistry School of the University of Istanbul (IU), Istanbul, Turkey, joins Clinerion's Patient Recruitment System platform, opening up new patient populations for patient recruitment and new clinical expertise areas for the running of clinical trials.

By joining Patient Recruitment System (PRS), patients at the Dentistry School can be matched to clinical research studies seeking to recruit patients for trials. Pharmaceutical companies using Clinerion's PRS will be able to evaluate the patient population of the dental hospital during the development of the trial protocol and the site selection steps of their drug trials, potentially bringing more international clinical research to Istanbul University. The hospital itself can rigorously identify and quickly enroll its own patients for trials using PRS.

The IU Dentistry School specializes in all fields of dentistry, from Oral and Maxillofacial Surgery to Prosthodontics, from Periodontology to Pediatric Dentistry, Endodontics to Orthodontics. The hospital treated over 97,500 patients in the past year.

Clinerion's Patient Recruitment System finds patients for clinical trials by checking clinical trial requirements against patient data from the databases of connected hospitals in real-time. Clinerion's hospital coverage in Turkey alone currently comprises hospitals in Istanbul, Konya and Malatya with a catchment area of 30 M people. PRS currently has access to over 350 M data entries. Additional use cases for PRS include Market Access Studies and Real World Data Analysis.

"We see a great benefit for our patients as well as for our hospital," says Prof. Dr. Gülsüm Ak, the Dean of the Dentistry School. "PRS will bring our patients access to innovative new treatments, while the Dentistry School will gain higher exposure and visibility for leading edge clinical research."

"The Dental Hospital of the University of Istanbul brings PRS new clinical expertise areas for the running of clinical trials and new patient populations for patient recruitment, expanding Clinerion's hospitals coverage," says Bari Erdoan, Clinerion's Country Head Turkey. "The continued expansion of PRS in Turkey shows the productive and material benefits brought by Clinerion to clinical trials in Turkey."

"We are thrilled to welcome the Dental Hospital of Istanbul University to the Clinerion PRS platform," says Ulf Claesson, CEO of Clinerion. "PRS will boost the number, quality and efficiency of their clinical trials activities, while also bringing their patients access to advanced medication."
