- Engineered for competitive gamers
- Latest models in award-winning XG range
- XG3202-C: ViewSonic's first curved display for UK gaming market
- XG2530: Features a 240Hz refresh rate, 1ms response time and exclusive ColorX™ mode

ViewSonic Corp. (<http://www.viewsoniceurope.com/uk/>), a leading global provider of visual solution products, today announces the launch of two new additions to its award-winning XG range: the XG2530 and the XG3202-C.

The ViewSonic XG2530 is a 25-inch gaming monitor, with a 240Hz refresh rate and embedded AMD FreeSync™ technology that has been designed to meet the specific needs of competitive gamers and professional eSports players. The monitor features a 1ms response time and native Full HD 1080p (1920x1080) resolution, meaning it is capable of eliminating screen tearing and stuttering for fluid gameplay even during the most graphic-intense sequences. The monitor's exclusive ColorX™ gaming mode helps optimise visual effects, making it ideal for immersive gameplay.

In addition to ColorX™, the monitor comes with an arsenal of pre-set customisable visual modes that make First Person Shooter (FPS), Real-Time Strategy (RTS), and Multiplayer Online Battle Arena [MOBA] games even better. A black stabilisation function improves visibility in dark scenes, while maintaining brilliant and vibrant colours and contrast.

The XG3202-C is ViewSonic's first curved gaming monitor to be available in the UK. It is a stylish 32-inch display with a 144Hz refresh rate and also features AMD FreeSync™ technology. Engineered with a focus on visual performance, it features an 1800R curvature radius, delivering a wide field of view from multiple angles and smooth image performance. This monitor's Full HD SuperClear® VA panel enhances colour accuracy and combines with the display's low input lag for engaging gameplay.

"Inspired to meet the very specific needs of the most demanding gamers, we developed these new XG monitors with a wide range of options that represent the difference between winning and losing," said Posen Wang, managing director at ViewSonic Europe. "The XG2530 and the XG3202-C monitors are standout products in our XG range and offer users the pinnacle of gaming performance, delivering the stellar, stutter-free action that competitive gamers demand."

MSRP at launch

XG2530: £399

XG3202-C: £399
