Buy any 3 and the cheapest is free

Everyone may be going green, but Malki have never been anything else! To achieve perfectly healthy and balanced skin we need to eat foods as close to their natural state as possible and follow a similar beauty routine. After all, skin is the body's largest organ and what we put onto it is absorbed into the blood stream with frightening speed. So it makes sense to check our beauty labels just as we do our groceries.

NO PARABENS OR SODIUM LAURYL SULPHATE

Un-natural preservatives such as parabens and chemical foaming agents such as sodium lauryl sulphate have slipped into our beauty products over the years. In the same time skin problems and certain cancers have increased and although the jury is still out on whether there is a direct link, there is increasing evidence to support the connection.

Parabens are cheap preservatives used in thousands of beauty products and sodium lauryl sulphate is a surfactant that helps a liquid to foam. It can be found in everything from soaps to shampoos, and is such a powerful detergent that it is also used as an industrial degreaser in car washes and garages to clean oil from the floor. Malki Dead Sea bath, body and hair products do not contain parabens or sodium lauryl sulphate and have been pure and natural since the creation of Malki's first soap over 200 years ago.

THE MALKI SECRET

The Malki family have known the secret of natural ingredients drawn from the mineral-rich Dead Sea for centuries. Experts in the field of making skin and environmentally-friendly products, they have never needed to add harsh chemicals to make the Dead Sea range more effective. Natural ingredients such as palm, coconut and olive oils together with Dead Sea minerals are effective enough in soothing, healing and beautifying the skin. The range includes soaps, bath salts, shampoo, conditioner, body lotion, a body scrub, shower cream and a facial wash – all of which are perfect for a spot of green pampering.

With skin conditions such as psoriasis and eczema on the increase, people are seeking out natural and chemical-free products. With regular use, Malki Dead Sea products (<http://www.deadseabathcare.co.uk>) may benefit these problems and help relieve their itchy symptoms. They are also ideal for sensitive skin and scalps as they contain no synthetic fragrances or colourings and are suitable for vegetarians and vegans.

POWER OF THE SEA

The Dead Sea is found at the lowest part of the Jordan Valley and said to be the lowest natural water area on earth – 400 metres below sea level. It is enriched with health-giving minerals such as sulphur, iodine, calcium, magnesium and potassium. Visitors from all over the world flock to health spas nestled by its shores to immerse themselves in its therapeutic waters. Malki have captured these benefits and put

them into their products.
