

Misco Awarded Four Lots on Crown Commercial Service Technology Services 2 Framework

Submitted by: White Label Media (UK) Ltd.

Wednesday, 6 September 2017

Trusted supplier of IT solutions for the Public Sector now present across all Lots of CCS TS2

September 6th 2017 – Misco UK has been awarded a place on four Lots of the Crown Commercial Service (CCS) Technology Services 2 Framework (TS2). This latest success means that for the first time Misco is represented across all Lots of the Framework with the whole of its Services portfolio.

The Award – for Lots 1,2,3 and 4a – will see Misco (<http://www.misco.co.uk>) supplying a range of IT services to all UK public sector bodies including government and the wider public sector, social housing organisations, voluntary and community sector bodies, education and the NHS. Being on all Lots of CCS TS2 broadens Misco's reach and capability for their public sector customers to leverage expertise across Collaboration, Network, Security, Audio Visual, Infrastructure and Workspace transformation Solutions.

Framework agreements, such as CCS TS2, enable those seeking IT solutions for the public sector to place orders under a set of pre-agreed terms and conditions that ensure a reduction on time and costs associated with procurement. Already recognised across the Public Sector for delivering best value and exceptional return on investment (ROI) when it comes to the delivery of ICT solutions, Misco's success in this field underpins its status as an approved supplier to education, government and healthcare institutions.

Lee Dutton, Executive Sales Director, Misco, said: "Success across all Lots of the CCS TS2 Framework underlines the sterling job our team has been doing when it comes to providing sound advice and judgement on the delivery of tailored IT solutions for the Public Sector. Misco's experts will be able to provide strategic counsel at every step of IT transformation projects to ensure that IT becomes a true strategic asset for those within central and local government."

For notes on specific Lots please see below.

Notes to editors:

Lot 1 – Technology Strategy and Services Design

The identification and design of customer's technology strategies and services to meet end-user needs, including analysis, assessment, road mapping, and design.

Lot 2 – Transition and Transformation

Services which support the implementation of new services, providers, architecture or processes, including analysis, management, audit, implementation and review.

Lot 3 – Operational Services

The services, processes and tools required to manage provisioning, capacity, performance, security and availability of technology, including End User Services, Operation Management, Technical Management and Application and Data Management.

Lot 4(a) – Programmes and Large Projects - Services at Official security level and below
For large scale, complex or high-risk projects that require a range of services offered across Lots 1, 2 and 3.

About Misco

A leading provider of IT products, solutions and services to businesses and public sector organisations, Misco has operations in the UK and Ireland and also across Europe in Italy, Spain, the Netherlands and Sweden.

With over 30 years' experience and a portfolio of 40,000 information technology products from all the leading manufacturers, Misco has an established Public Sector Sales Team with specialists in Education, Healthcare and Government sectors to help your establishment choose the right IT solutions.

Misco's expert team understands that not all businesses have the necessary time and technical skills in house to deliver these complex solutions. That's why our Solutions and Services Team has six dedicated practices focused on Collaboration, Network, Security, Audio Visual, Infrastructure and Workspace transformation.
