- With screen sizes of 32-inches and up, ViewSonic offers a variety of large screen solutions ranging from full HD to 4K for work and entertainment

London, United Kingdom (25 th September 2017) –

ViewSonic Corp. (<https://www.viewsoniceurope.com>), a leading global provider of visual solution products, offers screen sizes of 32 inches and above with resolutions spanning Full HD to 4K for its VX and XG series to deliver larger screen space, higher resolution and phenomenal display performance for gaming, home entertainment and home office applications.

As we have witnessed an upward trend in the demand for high quality big screen displays, ViewSonic has developed a variety of large size monitors, including both flat and curved models that range from Full HD to 4K,” said Posen Wang, Managing Director of ViewSonic Europe and UKI Country Head. “Whether for work, for entertainment or anything in between, ViewSonic is determined to provide customers with a bigger and better visual experience.

ViewSonic’s large screen in VX series include the 32-inch VX3211-mh and VX3211-2K-mhd and the 43-inch VX4380-4K. Equipped with SuperClear® panel, ViewSonic’s large size VX monitors support wide viewing angle and up to 99% sRGB and 10 bit colour* to produce vibrant and true to life images. With QHD or 4K resolution, the screen displays 70% to 4 times more on-screen content than Full HD monitor to deliver the ultimate image detail and clarity.

Connectivity options include HDMI, DisplayPort, and Mini DisplayPort, as well as support for DaisyChain via DisplayPort and compatibility with MacBook and Ultrabook via USB 3.0*. Other feature include PIP/PBP functions, built-in 7 watt speakers, eye care technology and low power consumption making these models a suitable solution for both home and office use.

For users seeking an immersive gaming experience, the XG3202-C is a 32-inch Full HD VA panel with a rapid 144Hz refresh rate and 1800R curvature for an encompassing visual experience. XG3202-C comes equipped with AMD FreeSync technology, which eliminates screen tearing and stuttering for super smooth gameplay. The low input lag feature provides smooth screen performance even in the most graphic-intense sequences. In addition, the versatile connectivity of HDMI and DisplayPort, the USB power charging port and the eye care technology enhance the flexibility in applications and the comfort of extended viewing period.

“We’re excited for what the future holds for large screen displays and we look forward to fulfilling our customers’ needs with great products they can depend on,” said Posen Wang, Managing Director of ViewSonic Europe and UKI Country Head.
