CIPD Annual Conference & Exhibition, 8-9 November 2017

Manchester Central Convention Complex, Stand A20

hfx, an established provider of workforce time management solutions, will be showcasing its flagship Flexitime Management solution at the 2017 CIPD Annual Conference & Exhibition, on 8-9th November, at Manchester Central. Celebrating its 70th anniversary, the theme for this year's conference is 'Embracing the New World of Work' with a focus on the major shifts that are affecting organisations, the HR profession and the digitalisation of work, including the impact of technology on jobs. hfx will be previewing its cloud-based Time and Attendance solution, the latest generation of its workforce management solutions, as well as demonstrating hfx Access Control solution and EveryOneCloud, its new portal enabling staff from anywhere, at any time, to clock in using any device, including card, biometrics or phone.

Nick Whiteley, MD of hfx commented; "This year's conference is a great opportunity to discuss how the nature of work is changing with home and remote working, bringing with it the need to engage with staff outside of the physical office building. Many companies are demanding cloud based solutions that enable access anywhere and provide a "light touch" impact on internal infrastructure. Our Time and Attendance and Access Control solutions, as well as our new EveryOneCloud portal, strengthens our family of workforce management solutions that enable organisations of all sizes both to manage staff time and keep them safe."

hfx's cloud-based Time and Attendance System is a fully integrated Personnel Employee Management system which connects with HR, payroll, access control, finance, photo ID, time recording job costing and other key business systems.

hfx Access Control provides hardware, software and services wrapped up in one simple monthly payment in a Service-as-a-Solution package. The door controlling devices offer the option of either biometric (fingerprint) or proximity readers and can be fully integrated with hfx Flexitime Management. Staff attendance and location data captured by devices via EveryOneCloud can be easily integrated with workforce management and payroll systems to support the management of working hours and compensation.

hfx Flexitime Management is also available via the G-Cloud 8 and 9 digital marketplaces or can be installed as a standalone solution.

"Technology is a key enabler but the real driver continues to be the changing working environments and the expectations of companies to deliver more, faster. This relentless pressure is driving the demand for new models of working and agile workforces, often with employees wanting more flexibility in their working life. Electronic solutions can support flexible working while also reducing the admin burdens and with cloud technology both the business and employee can be engaged and involved," said Nick Whiteley.

NOTES TO EDITOR

About hfx

Founded over 40 years ago, hfx has a proven history of developing innovative staff time management solutions. The company introduced the concept of flexible working hours in the 1970s with its Flexitime® system, and has continued as a leader in the delivery of flexible working solutions.

The latest generation of hfx solutions are cloud-based, making them quick to install, easy to provision, cost effective to run, intuitive to use which supports enthusiastic user adoption, all of which provides a fast return on investment.

hfx workforce management solutions include flexitime management, access control, time and attendance and Everyone Cloud which is integrated portal enabling anyone, anywhere to clock in and out using any device. hfx solutions are fully compatible with all mainstream HR, Payroll and Human Capital Management systems.

Based in the home counties just north of London, hfx services clients across the public and private sectors throughout the UK. High profile customers include Home Office, Merck, Bentley Motors, Adidas, The Society of Motor Manufacturers & Traders (SMMT), Eaton Limited, MoD, National Farmers' Union, Hertsmere Borough Council, North Lanarkshire Council, Exeter City Council, Isle of Man Government, MoJ, Met Police, Flintshire County Council, Office for National Statistics, UK Intellectual Property Office, NHS Business Services Authority, Science and Technology Facilities Council and many more.
