

Introducing Simpatica Group | Helping hardware-centric technology businesses to thrive

Submitted by: Telemisis

Thursday, 23 November 2017

Derby, United Kingdom, 23rd November 2017: Formed through the merger of the combined assets of Telemisis and Tioga, Simpatica Group (<https://www.simpatica.group>) has been created to accelerate the commercialisation of hardware-centric technology.

Leveraging the group's combined assets and expertise in development, manufacturing, operations, sales, and marketing, Simpatica will:

- Drive synergies between the existing group companies, exploiting opportunities for international expansion, and entry into new markets.
- Nurture partnerships with academia and businesses; supporting them to develop their ideas into commercially viable products.

Professor Warwick Adams, Group Managing Director said, "At Simpatica we are investing in the future; expanding our world-class manufacturing and product capabilities, while also nurturing complementary partnerships with academia and industry."

Simpatica Group Limited incorporates the businesses of Audiotel International, Sixis Technology, Telemisis, Tioga, and SurePulse Medical, a joint venture with the University of Nottingham. The group employs over 150 people across the UK.

"Leveraging the expertise spread throughout the group will allow us to drive growth, both at home and abroad", commented Chris Begent, Group Sales & Marketing Director, "Working together across development, manufacturing, operations, sales, and marketing, will allow us to accelerate the introduction of innovative new products."

All the companies in the group will continue to trade under their own names.

About Simpatica Group:

Formed in early 2017 through the merger of the combined assets of Telemisis and Tioga, Simpatica was created to help hardware-centric technology businesses develop their ideas into commercially viable products; helping them make the transition from inspiration to value.

Through our product and service companies, the group's activities span a range of sectors, including:

- Electronics Manufacturing Services
- Industrial Internet of Things
- Medical Devices
- Security and Defence
