

Why We Need Biofuels For a Green Future

Submitted by: Oponeo

Wednesday, 21 March 2018

Fossil fuels are bound to run out, so it's time to take their alternatives more seriously.

Together with the team at oponeo.co.uk we prepared a comprehensive guide on biofuels and their use in the automotive industry in the form of an article with infographics. You can see it here:

Why We Need Biofuels For a Green Future

(<https://www.oponeo.co.uk/tyre-article/why-we-need-biofuels-for-a-green-future>)

The article and infographics give an overview of types of biofuels, provides information on what biomass or bio waste can end up in a fuel tank and eventually compares fossil fuels and biofuels.

The publication can be a valuable source of information for anyone interested in finding out more on biofuels as potential alternative energy sources. It can be used in full or in parts with relevant, clickable reference.
