

Excel Announced As A Finalist In The 2018 DCS Awards

Submitted by: Mayflex

Monday, 9 April 2018

Excel Networking Solutions (<https://www.excel-networking.com/>), the copper and optical cabling infrastructure provider, has been announced as a finalist in two categories for this year's DCS Awards. The categories are Data Centre PDU Product of the Year for the Intelligent PDU Family (<https://www.excel-networking.com/power-distribution-units>), as well as Data Centre Cabinets and Racks Product of the Year for the Co-Location Rack, launched into the comprehensive series of Environ racks and cabinets (<https://www.excel-networking.com/environ-racks>) in Q4 2017.

The DCS awards are designed to reward the product designers, manufacturers, suppliers and providers operating in the data centre arena. The awards ceremony is taking place on the 24th May at The Grange St Paul's Hotel, London.

Tracey Calcutt, Marketing Manager commented "It is great news that products from the Excel family have been acknowledged by the Data Centre industry."

"Our product range is constantly evolving and expanding to ensure we can offer a variety of solutions to a whole host of applications."

The full list of finalists for every category is available to view online (<http://www.dcsawards.com/shortlist.php>). Voting (<http://www.dcsawards.com/voting.php>) opens on 9th April and will close on 11th May, ready for the London-based awards ceremony at the end of the month.

Tracey continued "Excel recently showcased a selection of new products at the Data Centre World show in London and the Cloud Computing Exhibition in Paris, both of which featured new Copper and Enbeam fibre products, Enbeam fibre duct trunking and a range of Environ racks with accessories, including the Co-Location Rack in London."

Tracey concluded "In addition to the products we have also recently published the latest Excel Encyclopaedia edition 4 which is an excellent educational tool for any data centre manager to reference with regards to their network infrastructure. Alongside this we have a range of new and informative videos on our Youtube channel (<https://www.youtube.com/excelnetworking>)."

For further details on how Excel products can provide the right solutions for the Data Centre market, visit the website (<https://www.excel-networking.com/data-centres>).
