

MHR announces strategic partnership with HFX to extend flexible working and staff time management solutions

Submitted by: PR Artistry Limited

Wednesday, 20 June 2018

HFX, a leading provider of SaaS flexitime and workforce management solutions, has signed a Partnership Agreement with MHR. The agreement enables MHR (formerly MidlandHR) to offer the entire suite of HFX's Imperago cloud-based workforce management solutions which include Time & Attendance (T&A), Access Control and Flexitime Management.

Anton Roe, Chief Executive Officer at MHR stated; "HFX's range of products perfectly complement those of MHR, enabling us to extend our proposition to our client base. MHR can now offer our customers HFX's full Cloud solution range, from shift pattern design to T&A. This is an important addition to our fully integrated HR solutions."

Nicola Smart Chief Operating Officer at HFX commented: "We are delighted to be working with MHR to introduce the HFX range of products to their existing and future customers. HFX's products are a natural fit with MHR's own enterprise, commercial and public sector HR and payroll solutions and customers will have access to a powerful SaaS Cloud workforce solution for every staffing group."

Imperago solutions comprise:

Imperago Time & Attendance (T&A), which is a powerful, flexible and cost-effective solution that is both user-friendly and extremely easy to maintain. Imperago T&A is an all-in-one Service-as-a-Solution package that covers software, hardware, support and maintenance on a pay as you go basis with no upfront capital outlay. Imperago T&A is ideal for companies across all vertical sectors with 200 to 50,000 employees, particularly for those with shift-based workers.

Imperago Flexitime Management, is the market leading solution that is the preferred option throughout the public sector and local government organisations.

Imperago EveryOneCloud connects people and devices at whatever location, and logs time, supporting workforce planning and Time & Attendance solutions, enabling organisations of all sizes to monitor their staff and productivity. A cloud solution, EveryOneCloud can be ready to go within minutes, with no need for servers, software installation or heavy up-front costs. It integrates with and sends data to T&A, Payroll, Student Attendance and Workforce Management solutions (including rostering & shift management).

Imperago Workforce Design, the missing first step when implementing T&A solutions, is a powerful algorithm that provides staff-friendly and efficient rosters and shifts in a fraction of the time of a manual worksheet. It enables 'what if' modelling and scenario planning with ease.

Imperago Access Control provides a 'light touch' approach to securing and monitoring access to workspaces that requires very little infrastructure and significantly reduces the amount of cabling required. The door controlling devices offer the option of either biometric (fingerprint) or proximity readers and are manufactured in the UK to HFX's detailed specification.
