HFX, pioneer of Flextime® and cloud-based SaaS workforce management solutions enables flexible working for UK public sector with innovative Cloud offering

HFX (http://www.hfx.co.uk), a leading provider of SaaS flexible working and workforce management solutions, has announced that its Imperago Flexitime Management system has been accepted onto the Government’s G-Cloud 10 digital marketplace. The Imperago cloud-based workforce management solution provides seamless integration with all major HR and payroll systems and incorporates the following modules:

• Imperago Flexitime
• Imperago Flexitime & Access Control
• Imperago Access Control
• Imperago Time & Attendance
• EveryOneCloud Automated Timesheet
• EveryOneCloud Lone Worker
• EveryOneCloud Student Attendance
• EveryOneCloud Visitor Registration

Nicola Smart, COO at HFX said; “The continued growth of the G-Cloud digital marketplace is testament to the Government’s commitment to transforming the way it works, streamlining as much public sector procurement as possible. The wider public sector continues to be a strong industry sector for HFX, as government organisations look to empower an ever more flexible workforce able to deliver a diverse range of services to the British public.

“Flexible working provides a much valued staff benefit, that is a relatively low overhead to the organisation and is a tax fee benefit to the employee, resulting in a more engaged and loyal workforce prepared to go the extra mile when required.”

The HFX solution is designed to integrate seamlessly with all mainstream HR and Payroll systems (including Oracle, SAP, MHR, CIPHR, PeopleSoft, Northgate and Software for People), enabling organisations to manage flexible working and time and attendance while keeping employee data synchronised. HFX Imperago solutions can be configured to meet exact requirements and supports unlimited numbers of work patterns.

Using the HFX solution to manage flexible working, organisations report more motivated staff, increased job satisfaction and reduced staff turnover and absenteeism. They also claim improved work/life balance opportunities and reduced staff costs and overheads. In addition, the system helps to support the latest changes in employment legislation.

G-Cloud sales figures published by GovSpend.org.uk show that spending via G-Cloud continues to increase

year-on-year once again in 2018 (up from £1,013,806,307 in 2017).
