August 2018

Ever wondered how you'd get on if you went back to school? Would you breeze through your coursework as a 1st class graduate from the university of life? Or does 1066 sound more like the price of a round of drinks than an important historical date?

Ryman has quizzed over 2000 members of the public to see how they fared across a variety of school subjects including history, mathematics, geography and modern languages. We've collected the results and examined the demographics, men vs women, north vs south and more.

If you want to look deeper into the results, a more detailed account can be found at Ryman.co.uk or on the attached press release.

Contact scott.beaman@pushon.co.uk for more information.
