Showcase at Stand BT445 - UK Construction Week - 9th to 11th October 2018 - NEC - Birmingham

Winchester, United Kingdom, 5th September 2018: Cloudcell Technologies are pleased to announce that we will showcase the CloudcellConnect platform to the construction industry at UK Construction Week 2018 (https://ukcw.cloudcellconnect.com/?utm_source=pr&utm_medium=rs&utm_campaign=ukcw), the UK's largest built environment event.

The CloudcellConnect platform enables construction firms of any size, to rapidly connect remote site and sales offices to a corporate network or the internet, and provide a remote site network and business telephone solution.

Already used by leading construction companies, Andy Murray, Group IT Director, Cala Homes said, "Having deployed a number of site connectivity solutions CloudcellConnect from Cloudcell Technologies was the first to meet our need for a reliable, fully managed service. CloudcellConnect delivers rapid connectivity for both voice and data and has transformed our ability to communicate with remote sites across our estate."

Recognised for its innovative exploitation of SDWAN technology, CloudcellConnect is part of the show's Innovation Trail and can be found at the Cloudcell Technologies stand, BT445 (https://ukcw.cloudcellconnect.com/?utm_source=pr&utm_medium=rs&utm_campaign=ukcw), in Building Tech Live.

"CloudcellConnect brings best in class connectivity to construction sites of any size, and in any location", commented Kevin Boyle, Managing Director, Cloudcell Technologies, "all delivered in under 48 hours, by our team of mobile experts."

To arrange a meeting at the show, or simply to discover more about CloudcellConnect in the construction sector, please visit our dedicated show microsite at ukcw.cloudcellconnect.com (https://ukcw.cloudcellconnect.com/?utm_source=pr&utm_medium=rs&utm_campaign=ukcw).

If you need to get your construction site connected sooner, please get in touch, today. (http://www.cloudcelltechnologies.com/?utm_source=pr&utm_medium=rs&utm_campaign=ukcw)

oOo

About CloudcellConnect:

The CloudcellConnect platform enables construction firms of any size, to rapidly connect remote site and sales offices to their corporate network or the internet, and provide a remote site network and business telephone solution.

Reliable: Our team of mobile experts use a range of class-leading antennas and network failover technology to maximise 4G speed and availability, keeping remote sites connected with confidence.

Proactive: Remotely monitored and controlled through our industry-leading support portal, a construction firm's existing IT Helpdesk staff have instant access to unique insights into performance and potential issues at remote sites, without the need for expensive site visits.

Flexible: In addition to LTE and LTE-Advanced, CloudcellConnect supports alternative WAN technologies, including ADSL and Satellite, allowing a prioritised cascade of communication links, all managed through the same support portal, optimising investment.

Scalable: Exploiting the capabilities of SDWAN, CloudcellConnect scales as a construction firm's demands change over time:

- across single or multiple construction sites, of any size, in any location
- providing increased speeds, through bonding of multiple WAN connections, for construction sites where this is essential
- and cost-effectively replacing expensive dedicated MPLS links, whilst maintaining business continuity

Rapid: CloudcellConnect installations can be completed in under 48 hours, connecting remote sites without unnecessary delay.

CloudcellConnect is provided as a fully managed service. Cloudcell Technologies provide installation, full on-site support, firmware upgrades, reinstallation at a new site or decommissioning, providing ultimate peace-of-mind.

About Cloudcell Technologies Limited:

Cloudcell Technologies are leaders in providing cost-effective, secure, reliable 4G connectivity in any location - urban or rural, on land or at sea. The CloudcellConnect platform from Cloudcell Technologies is a rapidly deployable business grade voice and connectivity solution for new, interim or mobile sites and offices; no office is too big or too small. CloudCell Technologies deliver best in class connectivity in less than 48 hours.
