

# Mayflex Introduces Great New Features to its Xtra Online Ordering Facility

Submitted by: Mayflex

Friday, 25 January 2019

---

Mayflex (<https://www.mayflex.com/>) the distributor of Converged IP Solutions has introduced a number of new and exciting features to its website. The Xtra online (<https://www.mayflex.com/node/10332>) ordering facility is a dedicated area of the website available to both existing account holders and entirely new customers to Mayflex.

Improvements include customers being able to order cut cable, including fibre via their Xtra account. By answering a couple of simple questions which specify how long they want the cable to be and how many cuts they'd like it to have cut cable can be ordered in this way.

An existing Mayflex customer can now create a [mayflex.com](https://www.mayflex.com) account themselves, online, rather than waiting for the request to be processed manually by a member of staff.

The last of these developments offer customers an option to pay for their online purchases using a visa, maestro or master card, offering them a maximum spend of £2000 per transaction. Newly registered customers to Mayflex can spend a maximum of £500 per transaction.

Luke Carthy, Digital Manager at Mayflex commented, "The inhouse web development team at Mayflex have been busy over the last couple of months introducing these new features. Each is designed to make it easier for both new and existing customers to work with Mayflex and make online purchases quickly and efficiently."

Luke continued, "Our aim is to continually improve our online purchasing experience for customers and forms part of the wider digital strategy for the business."

To find out more about the full range of infrastructure, networking and security products available from Mayflex visit [www.mayflex.com](https://www.mayflex.com).
