

JMR Software Provides Data Migration Expertise to Charles Taylor InsureTech

Submitted by: JMR

Tuesday, 26 March 2019

Johannesburg, South Africa, 26th of March 2019 JMR Software Pty Ltd (JMR) is proud to announce an agreement to provide data migration services to global insurance solution provider Charles Taylor InsureTech (<http://www.ctinsuretech.com>) (CT).

Mike Richards, CEO of JMR Software (<http://www.jmr.co.za>) says, "Over the past 30 years we have been instrumental in significantly mitigating risks for our partners and insurance clients and have a 100% successful track record in delivery of complex data migration projects. Our experience is second to none and we are looking forward to a solid and long-lasting partnership with Charles Taylor InsureTech."

JMR Software will provide data migration services in support of the implementation of the INSIS Policy Administration platform as well as other solutions as needed.

Dave Smith, Practice Director - Life, Health & Pensions at Charles Taylor InsureTech says, "Data migration can be left too late and not properly considered when dealing with major transformation projects, yet it can cause many issues if it is not completed successfully or on time. We wanted to ensure that as we continue to engage with more companies that we had the best possible solution in place for the migration of data from legacy systems to INSIS. It is good to have JMR's data migration expertise to support complex data migrations in support of our projects."

Charles Taylor InsureTech helps insurance providers on a global basis to simplify their operations through deploying technology-enabled solutions that quickly improve agility and remove inefficiencies.

CEO of Charles Taylor InsureTech Jason Sahota said, "We bring a fresh approach to helping insurance companies focus on achieving measurable success and driving powerful business outcomes through technology-enabled solutions. Our in-depth knowledge of the market, an unbiased technical position, and establishing strong partnerships with companies such as JMR Software enables us to achieve the results our customers' need. We recognise JMR Software as a leading provider of data migration services and that their approach, expertise and technology will de-risk the movement of data for our customers and that is why we partnered with them."

Charles Taylor InsureTech has a partner-centric approach that gives flexibility to adapt to a wide range of client challenges and think further than the constraints of any specific system. Based on this customer focused approach Charles Taylor InsureTech's partnership with JMR Software enables them to provide data migration services when deemed to be the best and most appropriate solution for their clients.

About JMR Software Pty Ltd

JMR Software has been helping its financial services customers to deliver technology that keeps pace with market demands for over 30 years. Established as an independent South African company, JMR Software also has strong international roots and relationships (particularly in the UK) that are built on integrity, expertise, capability and years of successful delivery. In particular, JMR Software knows the importance

of the data migration process and has developed its own set of tools - including its comprehensive BITShift data migration solution - which follows a strict methodology and has been tried and tested with numerous clients and has a 100% delivery track record of projects completed on time and within budget.
