Tuesday, 2 April 2019

DERBY, UK – April 2, 2019: Node4 (<https://www.node4.co.uk/>), the cloud, data centre and communications solutions provider, has today announced it has been selected as the “Best Cloud & Service Provider Partner of the Year” in the UK by Veeam® Software (<https://www.veeam.com/>), the leader in Backup solutions that enable Intelligent Data Management™, at the annual UK Veeam Partner Summit.

The awards recognise Veeam's local ProPartners and Veeam Cloud & Service Provider (VCSP) partners who have not only demonstrated success in providing Veeam Availability solutions to their customers, but who have also provided first-class support, expert knowledge, continued product education, and have a true Veeam strategy incorporated into their business. Named as the ‘Veeam Cloud & Service Provider Partner of the Year’ in the UK, Node4 was recognised as being the partner who made a great contribution to delivering cloud solutions in 2018.

“We are extremely proud to have received this accolade from Veeam,” commented Paul Bryce, CCO at Node4. “The award showcases the strong relationship we have enjoyed with Veeam for many years. We highly value our partnership, as we are able to utilise the countless benefits of Veeam's innovative and reliable data backup and protection services within in our own fully managed offerings. We look forward to many more years of collaboration with Veeam.”

“We are excited to recognise and honour Node4 as the ‘Veeam Cloud & Service Provider of the Year’,” said Greg Bailey, Director of Channel and Cloud UK and Ireland, Veeam. “Its investment in building and delivering Veeam-powered solutions and services at a first-class level is empowering the way our joint customers manage and protect their applications and data while solving key business challenges. Our partners share Veeam's commitment in bringing innovative data management solutions to help solve difficult technical and business challenges in a new multi-cloud world. We congratulate Node4 and look forward to continued mutual success in 2019.”

About Node4

Established in 2004, Node4 is an innovative and trusted Managed Services Provider that offers unparalleled end-to-end IT infrastructure and services, technical expertise and innovation, all fully managed and flexibly deployed across the company's own infrastructure fabric.

Its Services Gateway provides access to a powerful suite of technology solutions such as connectivity, cloud and data centre hosting, public cloud, data services, collaboration and security which enable the design and delivery of complex technology infrastructures for UK businesses in every sector.

Node4 owns and manages data centres located in Derby, Leeds and Northampton, as well as having dedicated space in a Slough data centre and points of presence in London and Manchester. They are all connected via our national fibre network which interconnects to all major UK carriers. Node4's headquarters are in Derby with other offices located in London, Reading, Nottingham, Leeds and Northampton.

Node4 delivers intelligent, efficient and scalable hybrid IT solutions underpinned by exceptional Service-as-a-Standard for customers focussed on transforming their businesses to succeed in the digital age.
