

Cradlepoint and RCR Wireless host 5G emerging killer apps panel event at 5G World London

Submitted by: Touchdown PR

Monday, 10 June 2019

West Byfleet, U.K – 10th June 2019 – Cradlepoint, the global leader in cloud-delivered LTE and 5G Ready wireless network edge solutions (<https://cradlepoint.com/>), will be hosting a networking event and panel discussion at 5G World with RCR Wireless News (<https://www.rcrwireless.com/>) on 12th June 2019, at Fox Pub near the London ExCeL with registration starting from 6pm and the panel at 7:30pm.

Moderated by RCR Wireless News Editor in Chief, Sean Kinney, industry experts will take stock of where we are today and highlight a number of new 'killer app' use cases that take advantage of Gigabit-Class LTE and 5G. Attendees will hear from organisations driving practical 5G applications and about the benefits these new technologies promise. The nuanced conversation will dive into the technological outlook, use case development and regulatory machinations that will guide the 5G future.

Doors open from 6pm, with heavy hors d'œuvres and a fully staffed open bar available ahead of the the panel, which is ideal for industry networking. The panel will then take place around 7:30pm. The panel discussion will be followed by a live Q&A session with the audience.

"As operators and ecosystem partners continue to invest in and scale out 5G, this event is the ideal opportunity to discuss the new and transformative use cases that will enable companies to change paradigms and potentially even introduce new business models," said Lindsay Notwell, SVP 5G Strategy & Global Carrier Operations at Cradlepoint.

The panel will include Cradlepoint's 5G expert, Lindsay Notwell, as well as Marco Contento, VP Technologies at Telit; Paul Coffey, Head of Strategy at Dense Air and Todd Landry, Corporate VP Product and Market Strategy at JMA.

"With the recent launch of commercial 5G services in the UK, the topic and location have never been more appropriate," said Sean Kinney, RCR Wireless News Editor in Chief and panel moderator, commenting on the event. "I'm looking forward to joining a group of industry experts to discuss what this latest generation of cellular means for consumers and businesses. This is shaping up to be a terrific event."

Click here and register to attend Enterprise 5G Use Cases: Experts discuss emerging killer apps on 12 June 2019 at Fox Pub, London ExCeL.

About Cradlepoint

Cradlepoint is the global leader in cloud-delivered wireless edge solutions for branch, mobile, and IoT networks. Cradlepoint's Elastic Edge™ vision — powered by NetCloud services — provides a

blueprint for agile, pervasive and software-driven wireless WANs that leverage 4G and 5G services to connect people, places and things everywhere with reliability, security, and control. More than 25,000 enterprise and government organisations around the world, including 75 per cent of the world's top retailers, 50 per cent of the Fortune 100, and first responders in 10 of the largest U.S. cities, rely on Cradlepoint to keep critical branches, points of commerce, field forces, vehicles, and IoT devices always connected and protected. Major service providers use Cradlepoint wireless solutions as the foundation for innovative managed network services. Founded in 2006, Cradlepoint is a privately held company headquartered in Boise, Idaho, with a development centre in Silicon Valley and international offices across EMEA and Australia.
