One of the upsides of colder days and winter's longer nights is chance to pamper yourself, rejuvenate skin and boost wellbeing with baths and massage and using Love Henri aromatherapy oils will make the experience extra special.

Used for centuries and in many different cultures, aromatherapy has been proven to work not only on a topical level to help ease tension, smooth and refine skin but via the body's sensory circulation to lift spirits, relieve anxiety and improve sleep. And it's the beautiful scents and aromatherapeutic properties of traditional favourites including jasmine, bergamot and sandalwood that renowned UK-based aromatherapist Henrietta Cassar has incorporated into her LOVE HENRI range.

The collection of 10 skin and body oils and a luxe, multi-tasking balm, Henrietta has used her 15 years' experience to deliver the purest essential oils available in truly therapeutic amounts, hand poured into sustainable packaging and all delivered with LOVE!

Love Henri is a socially conscious brand and proud to be registered and certified with Cruelty Free International and The Vegan Society.
