Wednesday, 27 November 2019

- The latest industry accolades further cement the company's reputation in FS for real-time regulatory compliance and trading system integration for STP, delivered with unbeatable customer support

London, UK – November 27th, 2019 - Inforalgo (<https://inforalgo.com/>), the STP specialist for Capital Markets, has won no fewer than three financial services industry technology awards, as voted for by the market. Comprising first place for Customer Support and top-3 slots for Regulatory Compliance and Integration With Other Systems in bobsguide's 2019 Software Rankings, these achievements reflect the huge impact Inforalgo's cloud-hosted solutions are having in its target market. Here the demands for a solution to ever growing complexity in data interoperability, and real-time reporting are soaring in response to regulators' pursuit of improved market transparency.

To compile the annual rankings, bobsguide (<https://www.bobsguide.com/>) asks the market to vote for those firms they believe to stand out from the competition – those who have gone the extra mile in terms of development and servicing their customers, and/or have demonstrated business attributes that set them apart from the herd. Each year, the Rankings become more competitive, reflective of the vibrant fintech ecosystem and the market it serves.

Inforalgo's top ranking for customer support reflects the attentive service the company provides to its global client base. This is something that is regularly mentioned when clients are interviewed about their reasons for choosing Inforalgo to solve their trading data integration and real-time reporting challenges. Amid soaring regulatory compliance demands, and rising complexity and costs, Inforalgo excels in taking market participants' pain away – by connecting them to the company's cloud-hosted platform, which makes light work of inefficiencies in trading system integration for STP and real-time reporting problems.

Commenting on Inforalgo's impressive 2019 rankings, CEO Jordan Ambrose said, "We are delighted that the market has recognised us in the three categories in which we pride ourselves most – the support we provide to our clients, and our ability to relieve their regulatory and data integration issues. It confirms to us that our dedication and commitment is paying off, and that the value we offer is widely recognised. I couldn't be more proud of our team - their expertise, unrivalled knowledge of the needs of our market, and their diligence in advising on the most appropriate solutions for each client scenario.

"This is an industry in a constant state of flux," he added. "What financial institutions and proprietary trading firms want is a solution which not only meets their current needs, but will also serve them well in the future as international market requirements continue to evolve. We believe that's where we excel, and it is gratifying to have that reflected back to us in this year's bobsguide rankings."

About bobsguide

bobsguide connects buyers and sellers of financial technology globally. It attracts over 70,000 fintech

buyers and sellers each month, who want to be connected to the latest insights, the best suppliers, job roles or digital talent, as well as information on the latest live and digital events and downloadable resources such as whitepapers and case studies.
