---

British security company to unveil enterprise solution and showcase its innovative cloud-based products for securing removable storage devices and optical media

London, UK 12 April 2011 Conseal Security (<http://www.consealsecurity.com/>), the provider of solutions to secure data on the move (<http://www.consealsecurity.com/conseal-product-info/conseal-usb/>), today announced it will be exhibiting at Infosecurity Europe (<http://www.infosec.co.uk/page.cfm/Link=687/t=m/goSection=3>), taking place at London's Earl's Court exhibition centre ([http://www.infosec.co.uk/page.cfm?&LinkType=PowerBar\\_\\_&LinkTarget=http://www.infosec.co.uk/page.cfm/Action=External](http://www.infosec.co.uk/page.cfm?&LinkType=PowerBar__&LinkTarget=http://www.infosec.co.uk/page.cfm/Action=External)) on 19th-21st April 2011.

Now in its 16th year, Infosecurity Europe is Europe's number one Information Security event. Featuring over 300 exhibitors, the most diverse range of new products and services, an unrivalled education programme and visitors from every segment of the industry, it is the most important date in the calendar for Information Security professionals across Europe.

Conseal will be announcing the launch of a major new product for large enterprises as well as demonstrating its existing cloud-based security solutions for protecting data stored on portable media.

Company: Conseal Security (<http://www.consealsecurity.co.uk>)  
Stand: L90

On the Stand: Conseal will be launching its new enterprise solution for companies looking to manage and monitor removable storage devices via their own IT infrastructure or private cloud. Conseal will also be showcasing its Conseal USB (<http://www.consealsecurity.com/conseal-product-info/conseal-usb>) and Conseal CD (<http://www.consealsecurity.com/conseal-product-info/conseal-cd/>) solutions, which allow companies of all sizes to apply robust AES-256bit encryption and Conseal's unique Dual Locks security process to any removable USB device (USB stick, flash card, portable hard drive etc) or optical storage disk regardless of make. Conseal's cloud-based remote management console and detailed control features allow administrators and data owners to manage devices and media from a single view, limiting access and remotely wiping any device that cannot be accounted for, enabling organisations to meet today's strict data protections requirements.

Conseal will also be offering free versions of its products to take away and evaluate, as well as offering to Conseal any blank USB device attendees bring to the stand to demonstrate the technology and hardware-agnostic nature of the products.

## About Conseal Security

Conseal Security is a UK-based provider of security solutions to consumer and enterprise IT users looking to secure data storage devices on the move. Its unique products allow users to protect their data wherever they are, ensuring uncompromised security at home, in the workplace and in the field.

Users manage devices protected by Conseal's solutions using a cloud-based management console. This ensures that data integrity is maintained at all times while allowing organisations to remain compliant with industry and regulatory data protection guidelines.

Conseal's solutions deliver unrivalled protection for data stored on devices such as USB sticks, memory cards and external hard disks. It allows users to retain control and ownership of their private data, revoke access and render the device unreadable, even if the disk on which it's stored is no longer in their possession.

Conseal is headquartered in London, with a development centre in the Thames Valley.
