

# Brand new event to showcase wearable technology in Santa Clara

Submitted by: Evolve Digital Publishing

Thursday, 29 October 2015

---

Some of the most innovative startups, as well as thought leaders from across the world of connected technology will gather at The Future of Wearables event on the 1st & 2nd December 2015 in California.

The two day show boasts a dedicated conference track with major keynotes, panel discussions and the latest research on wearables and IOT. Keynote speakers include Stan Kinsey, President of Martian Watches; Ariel Garten, founder of Muse, and John Dargan, CEO of the smart textiles pioneer, Clothing+.

More than 35 speakers will take part in the conference, looking at innovative textiles, augmented & virtual reality, wearables in the enterprise and a host of other topics.

In the expo hall, the event has gathered together some of the most innovative start ups and prototypes for wearable technology, including ;

- Rufus Cuff – wrist mounted communicator
- Talon – smart ring
- Feel – revolutionary emotion tracker
- Blumio – the world's first cuffless blood pressure monitor
- eHat – a video/audio streaming hard hat for construction

John Weir, event director for organisers Evolve Media Group says “ We are delighted to be bringing The Future of Wearables to Santa Clara and showcasing some of the best speakers and companies that the industry has to offer. This should be a very informative and entertaining couple of days.”

Early bid tickets for the event are available now -
