The perfect range....for her/him/them.....your four-legged friend....advocates of natural products.....supporters of independent businesses....those looking for something for both pets & pet parents.....vegans.....champions of plastic-free industry.....

Whether it's a relative, friend or even for four-legged companions, the BeLoved 100% natural pet care range is a superb gift idea for any occasion. Delivering beautiful results whilst also looking rather lovely within the home, the range was officially launched just eight months ago. BeLoved is backed by a great story, and a dedicated team who hand pour and package every single product here in the UK, and who are passionate about looking after our pets, ourselves and the world around us. Find out more below.

A family heirloom provides inspiration for the range

The inspiration for Be:Loved came in the form of an old family heirloom: a farmhouse recipe book. Be:Loved's founder's father-in-law and his wife, both farmers and stock people, used the recipe book to create farmhouse fare when they had no money – using nothing but what they could find in the hedgerows or from nature's harvest. Together they compiled a treasure chest of recipes – from soaps and shampoos to help farmers clean grubby hands and paws, to moisturising balms for callouses – and absolutely everything was natural. It is these recipes that have been reimaged for our four-legged friends to create an effective and luxurious range of British, hand-made products to help care for and delight pets and pet-parents alike.

Since its launch the range has expanded to help dogs with sensitive skin, whilst extra moisturising aloe, goats' milk, hemp and shea butter have been added to improve dry or cracked paws, and natural insect repellents sourced to help keep bites at bay when adventuring in the great outdoors. Made of luxurious and moisturising ingredients, the range of soaps, sprays, oils and balms work to protect and nourish our hands as well as giving your dog the natural boost they deserve.

Always tested on humans!

Utilising the natural healing powers of the world around us, the Be:Loved team tested the products first on themselves, with the belief that if it is good enough for them then the Be:Loved range will certainly be good enough for our much-loved pets.

The Be:Loved EcoPledge

The full range is also MIT and paraben free, and is supported by an EcoPledge, which means no plastic is used anywhere in the range.
