Acceptance streamlines public sector customers' ability to deliver a modern learning experience proven to increase engagement and accelerate learning

BRACKNELL, U.K. – November 7th, 2019 – Skillsoft (<https://www.skillsoft.com/>), a global leader in corporate learning, today announced it is accepted onto the UK Government's G-Cloud 11 framework. G-Cloud is the UK government's procurement system allowing public sector bodies to search, evaluate and procure cloud computing services from a framework of suppliers. Now, any UK public sector organisation, including agencies and arm's length bodies, can now license Skillsoft's award-winning intelligent learning experience platform, Percipio, using the government's Digital Marketplace.

The G-Cloud 11 framework went live in early July 2019, providing access to more than 30,000 services and more 4,000 suppliers through the Digital Marketplace. Percipio can be found on the Digital Marketplace here (<https://www.digitalmarketplace.service.gov.uk/g-cloud/services/195856166377116>).

Skillsoft brings 20 years' experience in the eLearning industry to the UK public sector. Through Percipio, Skillsoft provides access to thousands of courses, videos, books, and audiobooks, curated into nearly 700 learning paths (channels). The personalised user experience and highly engaging content supports four key content areas: Leadership & Business, Technology & Developer, Productivity and Collaboration, and Compliance. With Percipio ELSA (<https://www.skillsoft.com/platform-solution/percipio/percipio-elsa/>) (Embedded Learning Synchronised Assistant), learners can watch, read, listen, and practice via their browser, mobile device, or tablet, throughout their workday, directly in their natural workflow.

"With Brexit on the horizon, there is an element of uncertainty in the air and a real urgency to leverage learning to develop and enhance in-demand skills," said Steve Wainwright, Managing Director, EMEA at Skillsoft.

"Being accepted onto the G-Cloud makes it easier for us to work with our public sector customers to deliver a modern learning experience that's tailored to the specific needs of these professionals. Through Percipio, Skillsoft can help public sector organisations meet the challenges ahead with a truly personalised experience that's proven to increase engagement and accelerate learning," concluded Wainwright.
